Falconedge PLC
("Falconedge" or the "Company")

Contract Wins: Two new funds added as advisory clients to Falconedge's client base

Falconedge PLC (AQSE: EDGE | OTCQB: FEDGF) is pleased to announce that the Company has signed two new funds as clients to its hedge fund advisory services platform and is expecting this segment to continue to grow.

The addition of these clients increases Falconedge's advisory client base by 40%, and marks a further step in scaling the Company's core advisory business and services range. The growth in recurring advisory services supports Falconedge's strategy of building a fully sustainable and profitable operating model.

This expansion complements the Company's broader strategy, including its Bitcoin treasury and yield management policy which was implemented last December, as Falconedge continues to execute on its long-term plan to generate diversified and resilient income streams for shareholders.

Roy Kashi, CEO of Falconedge, commented:

"The addition of two new clients represents a significant increase in our advisory client base and reflects continued demand for Falconedge's platform. We remain focused on scaling our core advisory business in a disciplined manner while progressing our broader strategy, including the Company's Bitcoin treasury and yield management policy."

About Falconedge

Falconedge (AQSE: EDGE) provides turnkey hedge fund advisory services for asset and fund managers delivering expertise across fundraising, investor relations, DeFi and treasury strategy, and operational growth. Founded in 2025, Falconedge is positioned at the intersection of traditional finance and digital innovation. By integrating Bitcoin-native solutions with institutional advisory experience, the Company helps asset managers scale efficiently, attract capital, and deliver sustainable performance while creating asymmetric exposure opportunities for shareholders. By blending consulting expertise with Bitcoin as a strategic reserve asset, Falconedge seeks to scale client operations while creating asymmetric exposure opportunities for its shareholders.
